

**Scottish Federation of Model Boat Clubs
Competition Rules**

NOMINATION COMPETITION RULES

This class is for any radio controlled model boat.

- 1 The model is sailed around a course and is timed to an accuracy of 0.01 second.
- 2 The competitor is then told the time taken and must nominate an estimated time for completing a second sail around the same course.
- 3 This second sail is also timed and the difference between the nominated time and the actual time taken is calculated.
- 4 The lowest time difference is the winner
